## How to solve

- **Score in one turn!** The player named under each puzzle moves — and must score immediately, into the lightly shaded goal.
- **One turn, many lines.** Every line ending on a used dot or the border is a bounce: the same player moves again. A solution is one unbroken chain.
- **Printed lines are walls.** They were already played — you can't redraw them, but you can bounce off them.
- **Difficulty.** Levels run from 1 (warm-up) to 10 (expert); the move count under each puzzle is the length of the scoring chain.
- **Stuck?** Every solution is in the back, written as an arrow chain (↑ ↗ → ↘ ↓ ↙ ← ↖).
